---

Career Objective

A motivated recent BIS (Business Information Systems) graduate from the Higher Institute for Advanced Studies. Founder of the "Sakan" platform, with hands-on experience in building, deploying, and securely managing live scalable applications using Laravel and Domain-Driven Design (DDD).

Eager to apply my technical skills in more real-world scenarios and drive growth.

SKILLS

Back end:	Front End:	Database Management
PHP, Laravel (DDD)	HTML5 , CSS	MySQL, Oracle
RESTful APIs	Bootstrap , javaScript	
Tools & DevOps:	**Networking & Security:**	**Languages:**
Git, Postman	Network+ , CCNA	English (Intermediate)
Live Deployment	Web Security & Protection	Arabic (Native)

Web Hosting, Administration & Deployment: Experience in deploying static websites on Netlify and dynamic live projects with databases on Aeon, along with continuous server management, maintenance, and web security.

Experienced in using AI technologies to optimize workflows, automate tasks, and improve decision-making, resulting in increased productivity and efficiency.
